Introduction

AdminStudio Package Feed Module has an additional license that you will activate alongside your **AdminStudio Professional** or **Enterprise** license; it does **not** replace your existing **AdminStudio** license.

Please follow the step-by-step instructions below to enable the Package Feed Module with your existing AdminStudio license.

Please Note the Following:

*The screenshots show an **AdminStudio Enterprise per Employee** license, but the process is the same for AdminStudio Professional and Enterprise license holders.*

You will need internet access on the workstation on which you will run AdminStudio. More information on what ports needs to be open can be found in the Product Documentation [here](#).

To perform an Offline Activation, follow the instructions in the Product Documentation [here](#).

Package Feed Module is a subscription-based license. After subscription ends, Package Feed Module ceases to work, however AdminStudio base license (Professional or Enterprise) will continue to work as is.

Step by Step Instructions Walkthrough

Step 1 – Launch AdminStudio

Launch the [AdminStudio Application Manager](#). Click on the **Support** tab at the top.

Step 2 – Open the Application Manager About Dialog

Click on the [About Application Manager](#) button on the ribbon.

Step 3 – Upgrade the AdminStudio License

On the About Application Manager dialog, you'll see the *Edition* of your AdminStudio license (i.e. *Professional* or *Enterprise*) along with its corresponding activation code.

Click on the **Upgrade** button on the right side in the dialog box.

Note: The activation code has been obscured in the screenshot above.

Step 4 – Activate Your Package Feed Module License

Enter your 16-character hexadecimal Activation Code (formatted XXXX- XXXX- XXXX- XXXX) you received from your Flexera Order Confirmation email message or found in the Flexera Product and License Center web portal into the Enter Your Activation Code field on the AdminStudio Product Activation dialog box.

Note: The activation code has been obscured in the screenshot above.

Step 5 – Restart AdminStudio

Once successfully activated, AdminStudio will indicate the success of the activation and require you to restart the product. Click **OK** to continue.

Step 6 – Confirm Activation of the Package Feed Module

Repeat Steps 1 through 3 and you will see your Package Feed Module subscription license listed in the **About** dialog box with the days left until your Package Feed Module license expires along with the corresponding activation code you used in Step 4.

Note: The activation codes have been obscured in the screenshot above.

You may now use the features available in the **AdminStudio Package Feed Module** within the **AdminStudio Application Manager** program (as well as through the PowerShell Cmdlets available for AdminStudio Enterprise users). More information can be found in the Product Documentation [here](#).

About Flexera

Flexera helps executives succeed at what once seemed impossible: getting clarity into, and full control of, their company's technology "black hole." From on-premises to the cloud, Flexera helps business leaders turn IT insight into action.
